Swiggy Analytics Dashboard

Interactive Power BI dashboard for analyzing restaurant performance, city operations, cuisine trends, customer ratings, pricing, and delivery insights

Project Overview

The objective of this dashboard is to analyze Swiggy restaurant data to identify operational trends, cuisine popularity, pricing patterns, delivery efficiency, and customer satisfaction across multiple cities.

Dataset Overview

The dataset contains restaurant-level information including:

- ID
- Restaurant Name
- Area
- City
- Food Type
- Average Rating
- Price
- Delivery Time
- Total Ratings
- Address

Tools & Techniques

- Power BI
- Power Query Data Cleaning
- DAX Measures
- Conditional Formatting
- KPI Cards
- Matrix Tables
- Top N Filtering
- Interactive Visualizations
- Cross Filtering & Slicers

Key KPIs Used

- Top Cuisine Category
- Highest Rated Cuisine
- Cheapest Cuisine
- Fastest Delivery Cuisine
- Average Rating
- Average Price
- Average Delivery Time
- Total Restaurants
- High Rated Restaurants
- Top Restaurant City
- Highest Rated City
- Fastest Delivery City
- Most Expensive City

Key Insights

- Chinese cuisine has the highest restaurant presence.
- North Indian cuisine shows premium pricing trends.
- Desserts categories receive high customer ratings.
- Delivery times vary significantly across cuisines and cities.
- Popular cuisines do not always have the highest ratings.
